PROFILE

UI/UX and digital designer with front-end development skills. Passionate about simplifying complexity and building scalable and accessible design solutions with experience working in a highly regulated industry.

RELEVANT EXPERIENCE

Digital Marketing Executive (UI/UX & Digital Design)

Volume Up Digital | Pharmaceutical Marketing Agency | May 2025 - Present | London, UK

- Served as the Primary UI/UX designer on a greenfield CMS designed to consolidate marketing materials for a pharmaceutical client. This involved participating in stakeholder discovery sessions to define requirements and identify pain points, translating findings into user flows and interface designs, designing for usability and regulatory compliance. The product launched successfully, making it easier for sales reps to find materials and for marketing teams to organise them efficiently.
- Continued iterating on the CMS after launch based on user feedback, preparing for the launch of V2. Key improvements included redesigning the IA to be more streamlined, improved definition of asset lifecycle states (draft, active, expired, archived, deleted), and more rigorous user journey mapping which aided in better handoff accuracy.
- Worked on a UX audit for a client website, identifying components that had been implemented in ways that harmed usability. Redesigned the affected section using the existing component library to improve information hierarchy and usability.
- Worked on UI projects including designing the homepage for a new pharmaceutical brand and an HCP event platform, working within established design systems. QA'd the event platform utilising Jira and collaborated with developers to resolve any issues.
- Applied UX best practices and addressed accessibility issues (e.g. contrast, CTA clarity, content structure) across marketing materials, including email templates, e-learning, and print media.

Design Intern

Flickr Foundation | Non-Profit Archival Organisation| June 2023 - September 2023| London, UK

- Contributed to the Foundation's first curatorial project, A Flickr of Humanity, supporting research, design development, and production of print publications and digital assets.
- Contributed to copywriting and WordPress website maintenance.

PROJECTS

London Parkive

BA Design Final Year Project | November 2023 - June 2024 | londonparkive.mayaosaka.com

- Researched, designed, and built an interactive map website documenting the history and evolution of London's parks and open spaces.
- Primary research included visits to local borough archives and cross-referencing georeferenced historical maps (National Library of Scotland) to track park expansions, closures, and boundary changes.
- Designed the interface in Figma, iterating based on user feedback. Built the full site in HTML, CSS, JavaScript, MapLibre JS, and Turf.js.

EDUCATION

BA Design | First Class Honours

Goldsmiths, University of London | September 2021 - June 2024

- Developed a broad range of technical design skills including Figma, Adobe Creative Suite (XD, Photoshop, Illustrator, InDesign), HTML, CSS and JavaScript.
- Acted as project manager, designer, and developer for the graduate exhibition website. This involved managing a small team who worked on the content management of the website.

Google UX Design Certificate

Coursera | March 2024 – Present | 5 of 8 modules complete

- Covers the end-to-end UX process: user research, personas, wireframing, prototyping, usability testing, and design systems.

SKILLS

Design: Figma (components, variables, auto-layout, interactive prototyping, FigJam), design systems, wireframing, user research, usability testing, user journey mapping, information architecture, interaction design, accessibility (WCAG), Adobe Creative Suite (XD, Photoshop, Illustrator, InDesign, Lightroom)

Development: HTML, CSS, JavaScript, MapLibre JS, Turf.js, web components

Tools: Jira, Notion

Languages: English (native), Japanese (native)
